

Amendments to the Specification:

Please replace the paragraph beginning on page 4, line 2 and ending on page 4, line 10 with the following amended paragraph.

A1
Meanwhile, according to the result of the number translation, if the call is a call from a different station, as shown in Figure 3, the termination processing unit 30 requests a calling party number from an incoming trunk processing unit 60. In case that there exists the requested calling party number in an originating ~~station~~ station 70, the incoming processing unit 60 reports the corresponding calling party number to the termination processing unit. If the requested calling party number does not exist, the incoming trunk processing unit 60 receives the calling party number directly from the subscriber terminal and informs the termination processing unit 30 of it.

Please replace the paragraph beginning on page 8, line 10 and ending on page 8, line 20 with the following amended paragraph.

A2
Upon discrimination, if the corresponding call is an intra-office call, the number translation unit 200 requests a terminating occupation from a termination processing unit 300 (S106, S107), and then, the termination processing unit ~~[[30]]~~ 300 checks whether the termination subscriber has registered for a calling party number call-back function (S108). Upon checking, if the corresponding termination subscriber has registered for the calling party number call-back function, the termination processing unit 300 requests a calling party number from the

A2
cancel
originating call processing unit 100 as shown in Figure 6, and then, when the termination processing unit 300 is informed of the calling party number as requested, it judges whether the switching system of an intra-office is a multi-station (S109~S111).

Please replace the paragraph beginning on page 9, line 11 and ending on page 9, line 15 with the following amended paragraph.

A3
Meanwhile, if the call requested in the step S106 is not an inter-office call, the number translation unit 200 requests a terminating occupation from the termination processing unit 300 (S117). In response to the terminating occupation request, the termination processing unit 300 checks whether the termination subscriber has registered for the calling party number call-back service (S118).

Please replace the paragraph beginning on page 11, line 23 and ending on page 11, line 25 with the following amended paragraph.

A4
Meanwhile, in the step S206, if the input code is not the calling party number confirmation code, the originating processing unit 100 performs a pertinent function [[S210]] (S211).
